LIST OF TABLE

TABLE 1: ANALYSIS AND STRATEGIC PLANNING.....	4
--	----------

Executive Summary

This report evaluates the key emerging technologies that are discussed in module 1 by providing recommendations to guide the client, improve operational effectiveness and support the strategic planning for businesses and government agencies.

Overview and Characteristics

New technology holds changing significance for some individuals. The definition provided in the module that new technologies referred to as emerging technologies, which is somewhat misleading like, Some individuals see emerging technologies as improvement of current innovations, which is shown creatively for contemporary purposes. There are Five (5) main characteristics of Emerging technologies, characterized by Radical Novelty, Relatively Fast-Growth, Coherence, Prominent Impact and Uncertainty and Ambiguity (Rotolo, Hicks, and Martin 2015). The primary technology areas evaluated include:

- Augmented Reality (AR) - It blends digital images, sounds texts to improve user perspective. (Examples: Social Media filters, Pokemon Go and IKEA place).
- Artificial Intelligence (AI) and Machine Learning - Simulated by Human intelligence.. (Example: in learning, reasoning, and problem-solving).
- Quantum Computers and IoT - provide internet-hosted by computing services while linking physical objects to enable real-time communication.

Analysis And Strategic Planning

Technology	Benefits	Strategic Impact	Implementation
Cloud Infrastructure	Scalability, reduced operational overhead, and decentralized data accessibility	High	Immediate
IoT Sensor Networks	Real-time data capture, and automated feedback	Transformative	Phased
Artificial Intelligence	Accelerated data processing, predictive insight and task Automation	Critical	Immediate

Conclusion

Strategic Technology bridges traditional manufacturing and modern digital systems as outlined in the Fourth Industrial Revolution, by integrating cloud architecture, IoT, and Ai frameworks. Organizations can achieve sustainable growth, improved quality, and also lower the operational costs.

GRAMMARLY AND AI CHECKER

The image displays two screenshots of AI detection and grammar checking tools.

Top Screenshot (ZeroGPT): The interface shows a header with the ZeroGPT logo, a language selector set to 'en', and buttons for 'Get Started', 'Register', and 'Login'. The main content area features a large semi-circular progress indicator showing '0% AI GPT*'. Below this, the text reads: 'Your Text is Human written'. The text being analyzed is: 'Emerging Technology Report: Module 1 Analysis Baldovino, Ayesha Elaine T. Bachelor of Science in Computer Science - 3A September 10, 2026 Johneros Puyo This report evaluates the key emerging technologies that are discussed in module 1 by providing recommendations to guide the client, improve operational effectiveness and support the strategic planning for businesses and government agencies. Overview and Characteristics New technology holds changing significance for some individuals. The definition provided in the module that new technologies referred to as emerging technologies, which is somewhat misleading like, Some individuals see emerging technologies as improvement of current'.

Bottom Screenshot (Grammarly): This screenshot shows the Grammarly interface for a document titled 'Baldovino ACTIVITY.docx'. The overall score is 100. The document content includes the title 'Emerging Technology Report: Module 1 Analysis', the author 'Baldovino, Ayesha Elaine T. Bachelor of Science in Computer Science 3A, September 10, 2026 Johneros Puyo', and the text: 'This report evaluates the key emerging technologies discussed in Module 1 and provides recommendations to guide the client, improve operational effectiveness, and support strategic planning for businesses and government agencies.' The section 'Overview and Characteristics' follows, with text: 'New technology means different things to different people. The module defines new technologies as emerging technologies, which can be confusing. Some individuals see emerging technologies as improvements to current innovations, presented creatively for contemporarv purposes. Emeralno technologies have five (5) main'. The right sidebar shows the Grammarly score of 100, tabs for 'Proofread' and 'Strengthen writing', and a 'Rephrase' button with the text 'Improvement of'. At the bottom, there is a 'Try our AI detection' button and an 'AI Detector' link.
