

Manila Manufacturing Corporation (MMC) Technology Adoption Interview Guide

Created by: Baldovino, Ayesha Elaine T

Year & Section: BSCS - 3A

Date: September 10, 2026

Instructor: Johneros Puyo

Prepared by: Technology Consultant at TechVision Consulting Inc.

Target Organization: Manila Manufacturing Corporation

Objectives

We're checking in to see how things are currently running, how clued in people are about new tech, how ready the team feels, and how easily we can roll out emerging tools.

Purpose

This guide gives us a roadmap to have a talk with key stakeholders in Manila manufacturing Corporation. We want to get a real feel for daily operations, spot any roadblocks, holding things back, and see just how prepared everyone is to embrace new technology.

Section 1: Interviewer Instructions:

- Take a quick look through the project scenario and brush up on Industry 4.0 basics, like Big Data, IoT, Cloud, AR, AI, Machine Learning, and Quantum Computing before heading into the room.
- Kick things off by building a friendly, collaborative vibe. Let them know we're here as partners to help them figure out the best path forward, and that all answers stay confidential to MMC's internal strategy.
- Treat the questions as natural conversation starters, and lean into the follow-up inquiries whenever something interesting comes up.
- Fill in the blanks directly beneath each question with concise, helpful notes.

Section 2: Interviewee Information

Date of Interview:	September 2026
Interviewer Name:	Baldovino, Ayesha Elaine T
Interviewee Name:	
Job Position/Company	
Contact Information	

Section 3: Background

Q1: How long has MMC been operating in business?

Response:

Notes:

Q2: How does your product cycle from raw materials into finished goods?

Follow-up: How do you track your production to secure it meets quality standards?

Response:

Notes:

Q3: If you see your daily operations, what are the biggest headaches that slow down your team's ability to continue the orders?

Follow-up: Can you share some examples of how these headaches usually affect your suppliers?

Response:

Notes:

Section 4: Technology Awareness and Readiness

Q4: Is your team familiar with the Fourth Industrial Revolution, specially the merging of machinery with digital systems?

Response:

Notes:

Q5: How does leadership here view cutting-edge tech? Do people see it as an exciting way to change how the company works?

Response:

Notes:

Q6: Some expert describes emerging technology into completely new, rapidly expanding, and somewhat unpredictable. When you come across a new device, how does MMC typically assess the risks?

Follow-up: To what extent does the company feel at ease investing in technologies where the final outcomes are still undefined?

Response:

Notes:

Section 5: Industry and Competitive Analysis

Q7: How do the other companies in the consumer goods market use modern tech to change how they deal with their suppliers and customers?

Follow-up: What specific pressures in the market are making MMC feel like it is the time to modernize?

Response:

Notes:

Q8: How do you think implementing some advanced device will fundamentally alter MMC's business practices in a few years?

Follow-up: How those changes translate into a better experience for the people buying your products?

Response:

Notes:

Section 6: Specific Technology Areas

Artificial Intelligence (AI) and Machine Learning

Q9: Is MMC using any smart systems that mimic human thinking like learning from patterns, reasoning, or self-correcting errors in your factory tasks?

Follow-up: If you view machine learning, where do you see the biggest opportunity to give your factory equipment with a bit of "human-like" learning ability?

Response:

Notes:

Q10: What matters to you the most when weighing the benefits and drawbacks of implementing AI in a consumer goods manufacturing setting?

Response:

Interviewer Notes:

Quantum Computing

Q11: Have you heard of quantum computing devices that use qubits to solve difficult problems far more quickly than conventional computers?

Follow-up: If quantum tech gets advanced enough to simulate designing new materials from drafts, how might that touch your product packaging?

Response:

Notes:

Big Data Analytics & Internet of Things (IoT)

Question 12: Right now, how does MMC pull together, organize, and make sense of many piles of data generated across your different departments to help managers to make calls in real-time?

Response:

Notes:

Q13: What scope do your everyday factory tools, sensors, and machines connect to the internet so they can talk to each other?

Response:

Notes:

Cloud Computing & Augmented Reality (AR)

Q14: How does MMC depend on cloud services, and does your current network have the lightning speed to handle response?

Response:

Notes:

Q15: Have you heard about Augmented Reality (AR)?

Follow-up: Did you imagine AR helping your employers by using it to pick up equipment via a tablet?

Response:

Notes:

Section 7: Skills and Capacity

Q16: Does MMC currently have an in-house IT team that has the bandwidth and know how to build and look after Industry 4.0 systems?

Response:

Interviewer Notes:

Q17: Looking at your current workforce, where are the biggest skill gaps if we introduce complex tech like AI, IoT tomorrow?

Follow-up: How does MMC typically handle training and expanding those knowledge gaps when new systems are out?

Response:

Notes:

Q18: How does the team usually react when a brand-new piece of technology is introduced?

Follow-up: Do you have any peer-support programs in place to help ease people through transitions?

Response:

Notes:

Section 8: Budget and Implementation

Q19: Has leadership set aside a specific budget for modernizing operations and testing out emerging technologies?

Response:

Notes:

Q20: If we were going to create a timeline for bringing in some of these Industry building blocks like Big Data, what kind of move works best for MMC?

Follow-up: Are there seasonal factory rushes that we need to plan around so we don't disrupt your workflow?

Response:

Notes:

Section 9: Closing

Q21: How MMC currently manages its supply chain relationships, and how might distributing analytics via IoT devices improve real-time responses with supplies?

Response:

Notes:

Q22: Viewing the characteristics of emerging technologies, how does MMC evaluate whether a new technology has relatively fast growth rates across public/private funding and knowledge outputs before adopting it?

Response:

Notes:

Q23: How does your current infrastructure support the collection and analysis of big data sets to instantly support real-time decision-making in your production lines?

Response:

Notes:

Q24:How do you anticipate integrating Industrial Revolution technologies will change the traditional human-machine production process at MMC?

Follow-up: How is management preparing the workforce for these shifts in daily interactions?

Response:

Interviewer Notes:

Q25: Are there any other aspects of MMC's daily operation that we haven't yet discussed, before we create a recommendation.

Response:

Notes:

We greatly appreciate you taking the time to share your honest thoughts with us. We will use all of your insights to create a clear, workable tech strategy adapted to Manila Manufacturing Corporation. This plan is helpful and customized to meet your needs since it will take into account your priorities and deal with the issues you raised.

RUBRIC FOR EVALUATION:

Criteria	Excellent	Good	Satisfactory	Needs Improvement	Score
Completeness of Sections	All 9 sections complete and well-organized	7-8 sections complete	5-6 sections complete	Less than 5 sections	/15
Question Quality	Questions are clear, relevant, and probing	Most questions clear and relevant	Some questions unclear or irrelevant	Many questions unclear or irrelevant	/15

Coverage of Technologies	ALL emerging technologies covered thoroughly	Most technologies covered	Some technologies covered	Few technologies covered	/25
Alignment with Scenario	Questions perfectly match the MMC scenario	Questions mostly match the scenario	Some questions match the scenario	Questions do not match the scenario	/10
Open-Ended Questions	Excellent mix with effective probes	Good mix with some probes	Some open ended questions	Few open-ended questions	/10
Professional Format	Very professional, clean, and organized	Professional with minor issues	Somewhat professional	Disorganized or messy	/15
Practicality	Questions are practical and usable	Most questions are practical	Some questions are practical	Questions are impractical	/10

TOTAL SCORE: ____ / 100
